

Automatic
parking space
bar guard

UNIPARK

**Today reserving your
parking space is possible**

The UNIPARK automatic bar is an innovative idea that can be applied in residential and industrial settings. It is easy-to-use and practical, and ensures that your parking space is always free.

AUTOMATIC GATES

UNIPARK

UNIPARK allows you to always park without wasting time

It is ideal for all those situations that require private or staff parking spaces to be safeguarded. UNIPARK also makes it possible to raise and lower the bar by simply using the transmitter.

Aesthetics and Efficiency. For improved management of the reserved parking space, UNIPARK is also available with an extra-length bar.

Total safety. Movement stop in case of obstruction detection provides maximum safety while in use.

UNIPARK features a base to affix the automation device to the ground in any applicative condition.

The electronics

The 24V technology employed in UNIPARK makes for a totally safe and reliable automation system, which also means:

> **Automatic pairing of radio code from transmitter to receiver**

> **Amperometric device detects obstacles and manages the endstops**

> **Input connector for system extension cards. Up to 4 UNIPARKs can be connected to the same control panel**

The models

UNIP
Irreversible 24V D.C. gearmotor with fixing base

ARK1
SMALL barrier

ARK2
LARGE barrier

Dimensions:

Standard system:

Technical features:

Type	UNIPARK
Degree of protection	IP54
Control board power supply	230V A.C. (50/60 Hz)
Motor power supply	24V D.C.
Absorbed input	1,7A max
Max power	20W
Operation intermittence	Intensive use
Manoeuvre speed	10s
Operating temperature	-20°C ÷ +55°C
